

Paediatric Stroke Days 2nd European Paediatric Stroke Conference

8. / 9. June 2018

Bern, Switzerland

Due to a special gathering of world stroke specialists in Bern, we would like to invite you all for two days dedicated to paediatric stroke.

Friday will be dedicated to clinical aspects with a wide variation of lectures - from acute management in stroke in emergency up to outcome and rehabilitation. We hope to attract many neuropaediatricians and paediatricians to this special day.

Saturday morning will cover research aspects in paediatric stroke. We will ask participants to tell about their ongoing and planned research by short presentations and have discussions on these topics.

We hope, that despite short notice many of you will join us here in Bern - either for just one or for both days. More precise information will follow soon.
